- Docker
- JavaScript
- Gin
- Go
- Laravel 8
- Php
- Django
- MongoDB
- Next JS
- SQL
- RESTful API
- MongoDB

Panudach Kongsomboon

BACKEND DEVELOPER

My goal is to pursue a career as a Backend Developer because I believe it is a crucial role in designing the system's backend. I am interested in working as part of a team and have a meticulous nature. I am also eager to learn new things. I hope you will give me the opportunity to contribute to improving the organization's system.

PROJECT & EXPERIENCE

Web application Book Project

- Developed a backend system for a library website
- Built the application using Express.js Javascript

Web application Bike shop Project

- Designed and developed an e-commerce website
- Backend developed with Laravel 8 Framework
- Frontend implemented using AngularJS and Bootstrap

Data warehouse AdventureWorksDW Project

- Utilized SQL Server 2014 for data management
- Worked with Microsoft's AdventureWorks demo database
- Managed databases using SQL Server Management Studio 2019

Web application CMN stock and shop Project

- Developed an e-commerce platform for stock and product management
- Frontend developed with Next.js

Web application stock and shop Project

- Built a platform for managing IT-related products
- Backend developed using Gin (Go Web Framework)

Backend Developer in Biotec

- Completed a 4-month cooperative internship as a Backend Developer.
- Developed and maintained RESTful APIs using Django and MongoDB.
- Implemented Docker for containerization and consistent development environments.
- Participated in system architecture design and technical decision-making.
- Collaborated with a team of 6 developers.
